

## Gora Shishka. Area 1. Panel 3

### Description

The panel represents a silhouette image of a deer shown in a "sudden stop" pose, an anthropomorphic figure and some fragments of linear zoomorphic images. All the figures are made with pecking.

### Technical description

The panel is located on the same rocky block with panel 2. It is exposed to the southeast. The sizes are 0.5x0.4 m. The panel is damaged by crumbling of the rock crust.
