

## Gora Sedlovina. Panel 3

### Description

The panel has several probably zoomorphic images made with pecking of a middle density with a tool with a flat working edge. The figures are linear. Also we can see some single pecked spots located in the lower area of the panel and made with the same tool.

### Technical description

The panel is exposed to the south. It is located at a height of 1.6 m from the ground surface. The sizes are 0.6 x 0.4 m. The panel is damaged by the crumbling of the rock crust. Also there are some local damages by lichens.

#### Epoch

Middle Ages, Ethnographic

#### Method

Retouch
