

Poylovskaya Pisanitsa. Panel 1.2

Description

The panel represents images of zoomorphic figures remained as fragments. All of them are made with pecking and turned right. A part of the figures are contour, the others are silhouette.

Technical description

The panel is located at a height of 0.7 m from the ground surface on the rocky outcrops of the Devonian sandstone. The sizes of the panel are 2.5 x 2 m. It is exposed to the west. The panel is damaged by the erosion processes. There are numerous crumblyings of the rock crust and the loss of most of it. The petroglyphs remained as fragments. The panel has damages by modern inscriptions made with both paint and pecking.

The panel is in disrepair and requires urgent conservation and restoration measures.

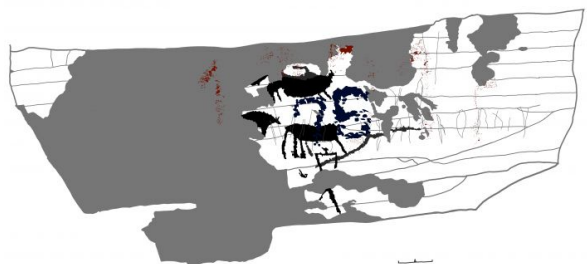

Epoch

Bronze age, Neolithic

Method

Retouch
