

Poylovskaya Pisanitsa. Panel 1.10

Description

The panel represents three contour animal figures made with rare pixel pecking. First two figures are shown partially. We can see back lines, a head, a neck, and front legs. All the animals are shown tilted up. The images are difficult to see due to the bad quality of preservation. The images are made with traditions typical for Minusinskij style.

Technical description

The panel is located at a height of 1.6 m from the ground surface on the rocky outcrops of the Devonian sandstone. The sizes of the panel are 1.2 x 0.6 m. It is exposed to the south. It has a tilt angle - 25°.

The panel is damaged due to erosion processes and the crumbling of the rock crust. Petroglyphs remained partly and it is difficult to see them. Also the panel is damaged by modern inscriptions.

The panel is in disrepair and requires urgent conservation and restoration measures.

Epoch

Neolithic
