

Shalabolinskaya Pisanitsa. Area 6a. Area 6a. Panel 11

Description

On the panel, we can see a contour zoomorphic image of a moose. It has a massive body with a small hump. Inside the body, there are some single pecked spots. The animal's head is down, the muzzle and horns are elongated. Front legs are placed as if they moved. Hind legs are not remained due to rock breaking.

Technical description

The surface is damaged due to exfoliation and crumbling of the rock crust.

Epoch

Bronze age, Neolithic

Style

Angara style

Method

Retouch
