

Kalbak-Tash. Panel 3

Description

A large rocky outcrop has a multiform composition with zoomorphic figures. Contour images of animals prevail. The animals are placed both horizontally and vertically. There are probably images of bulls. All figures are made with pecking. In addition to large contour figures of animals, images of animals made in a linear style are found on the panel.

Technical description

The rock is damaged by erosional processes. Detached and crumbling fragments of the rock crust are recorded.

Epoch

Bronze age, Neolithic
