

Kalbak-Tash. Panel 9

Description

The panel has a series of zoomorphic figures made with engraving. The largest figure of a deer is in the central part. The animal has a large body, an elongated neck with a small head and large horns. Two bent legs are shown. Patterns are shown inside the animal's body.

Technical description

The sizes of the panel are 0.7 x 0.4 m. The surface is damaged by erosion processes. Small foci of growing lichens are recorded.

Epoch

Early iron age
