

## Gora Kunya. Panel 15

### Description

A large rock frieze of Devonian sandstone has a multi-figured composition with zoomorphic, anthropomorphic, and ornithomorphic figures. Among the images of animals, the images of a deer prevails. There are also images of a horse, undefined ungulates, a dog (?). Stylistically, the images are not uniform. All figures are made with pecking.

### Technical description

The sizes of the panel are 3.2 x 1.2 m. The panel is damaged by erosion processes, cracking of the rock crust is recorded. In the upper part of the panel, a part of the rock crust is crumbled. As a result of it, probably, some of the images were lost. Modern pecked and scratched inscriptions are recorded on the panel. The panel is in an emergency condition.
